## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 1-10, drawn to a boost converter having a plurality of switching devices, classified in Class 363, subclass 59.

Group II: Claims 11-41, drawn to an apparatus and method of supplying electrical energy and charging circuitry, classified in Class 320, subclass 112.

Inventions Group I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations. (MPEP 806.05(c)) In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed as evidenced by claims 11, 24, 30, and 36, which do not include the particulars set forth in claim 1. The subcombination has separate utility such as a boost converter for hybrid vehicles.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2838

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
